

**NM EQIP FY 2005 Ranking Criteria Worksheet - Irrigated Cropland -  
Fort Sumner F.O.**

Applicant _____			Date _____
Farm No. _____	Tract No(s). _____	CMS Field No's. _____	
Tribal Land _____	Non-Tribal Land _____	Preliminary _____	Final _____

**1. Water Quantity - 150 Potential Points (31% of Total)**

Irrigation Efficiency - Use FIRS to evaluate. Benchmark & After points equal actual % efficiency times 1.5. Total equals after minus benchmark pts.			Potential Points	Benchmark Points	After Points
% Efficiency	% of Area in Contract before Treatment	% of Area in Contract After Treatment			
1-100%			<b>150</b>		
<b>1. Water Quantity</b>			<b>Total</b>		

**2. Water Quality - 100 Potential Points (21% of Total)**

A. Surface Water Pollutants - <u>50</u> Maximum Points			
<p>There is a probability that runoff water from irrigated fields contains sediment, salt, pesticides, and/or nutrients (or other associated chemicals). Treatment is needed to prevent these pollutants from entering live waters, or re-entering a shared irrigation system. Points will be awarded based on distance from the end of the field to the nearest live waters or re-entry point into a shared system. If there is no run-off, after points will be 0.</p>			
Distance of Surface Run-Off to Live Water	Potential Points	Benchmark Points	After Points
<100 Feet	<b>50</b>	0	
101 - 500 Ft.	<b>40</b>	0	
501 - 1,320 Ft.	<b>30</b>	0	
1,321 - 2,640 Ft.	<b>20</b>	0	
>2,640 Feet	<b>0</b>	0	
A. Surface Water	<b>Total</b>	0	0
B. Ground Water Pollutants - <u>50</u> Maximum Points			
<p>There is a probability that irrigation water containing salt, pesticides, and/or other nutrients (or other associated chemicals) is leaching into the ground water. Treatment is needed to prevent these pollutants from contaminating ground water, through leaching and/or direct flow into wells. Points will be awarded based on depth to the water table or elimination of any direct discharge to ground water (regardless of depth to the water table).</p>			
Depth to Water Table	Potential Points	Benchmark Points	After Points
1 - 10 Ft or elimination of any direct discharge into ground water.	<b>50</b>	0	
10 - 50 Ft.	<b>30</b>	0	
50 -100 Ft.	<b>15</b>	0	
>100 Ft.	<b>0</b>	0	
B. Ground Water			0
<b>2. Water Quality</b>	<b>Total</b>	0	0

**NM EQIP FY 2005 Ranking Criteria Worksheet - Irrigated Cropland -  
Fort Sumner F.O.**

**3. Selected Conservation Practice(s) - 180 Potential Points (38% of Total)**

Any practice used in the ranking criteria and intended to be included in the conservation schedule of operations must be cost-shared or have an incentive payment. Higher priority (value) should be given to those practices which address multiple resource concerns, are cost effective, and have longer life spans. Select resource concerns from NM Quality Criteria Guide.	Potential Points	Percent of Need to be Installed	After Points
<b>Soil Erosion</b> (Irrigation Induced)			
Irrigation Land Leveling (>100 Cubic yards per acre)(464)	<b>10</b>		
<b>Water Quality</b> (Excessive Nutrients & Organics in Surface Water)			
Irrigation Land Leveling (>100 Cubic yards per acre)(464)	<b>10</b>		
<b>Water Quantity</b> (Inefficient Water Use on Irrigated Land)			
Irrigation Water Conveyance (428)			
Unlined Ditch	<b>130</b>		
Concrete Lined Ditch			
% Damage=	<b>75</b>		
Irrigation Pipeline (430)	<b>20</b>		
LEPA Conversion (442)	<b>100</b>		
Irrigation Land Leveling (>100 Cubic yards per acre)(464)	<b>10</b>		
<b>3. Selected Conservation Practices</b>	<b>Total</b>		

**4. Other Considerations - 50 Potential Points (10% of Total)**

Items A thru D are required. If there are other criteria the D.C. wants to recommend based on LWG advice, please include it as item E.	Potential Points	Benchmark Points	After Points
A. At risk species habitat will be enhanced.	<b>10</b>	<b>0</b>	
B. Treatment of this land could have a beneficial impact on a 303d listed stream segment.	<b>5</b>	<b>0</b>	
C. Treatment of this land could enhance the benefits of an active/planned section 319 project.	<b>10</b>	<b>0</b>	
D. The land is within a NMED designated Category I watershed.	<b>5</b>	<b>0</b>	
E. Greater than 400 Acres benefited below project.	<b>20</b>	<b>0</b>	
150-400 Acres benefited below project.	<b>10</b>	<b>0</b>	
Less than 150 Acres benefited below project.	<b>5</b>	<b>0</b>	
<b>4. Other Considerations</b>	<b>Total</b>	<b>0</b>	

Total Points (After minus Benchmark):

Section 1 0      Section 2 0      Section 3 0      Section 4 0

Total Points for Worksheet: 0.00
